	Attorney Docket	UCSF-085 CON5	
DECLARATION OF JAY NADEL UNDER 37 C.F.R. § 1.132	Confirmation No.	9049	
	First Named Inventor	Jay A. Nadel	
	Application Number	10/816,159	
	Filing Date	March 31, 2004	
	Group Art Unit	1635	
Address to:	Examiner Name	J.J. Zara Preventing airway mucus production by administration of EGF-R antagonists	
Commissioner for Patents Alexandria, VA 22313-1450	Title		

Dear Sir:

- I, Jay Nadel, declare and say I am a co-inventor of the claims of the above-identified patent application.
- I have read the Office Action dated March 6, 2007 in this application and understand 2. that the Examiner has rejected pending claims 26-36.
- The data presented below show that a selective epidermal growth factor receptor 3. (EGFR) tyrosine kinase inhibitor reduces mucin induction in human nasal polyp epithelial cells. Therefore, an EGFR antagonist can be used to treat nasal polyps.
- We previously showed that human nasal polyp epithelium overexpresses mucins and 4. EGFR. These data were included in Example 8 of the instant application.
